

H921: REX Indoor Cycling

Resistance:
Friction

Resistance levels:
Infinite

Flywheel weight:
20kg

Maximum user weight:
150kg

Dimensions:
104 x 63 x 117cm

TECHNICAL SPECS

- Strong Poli-V belt drive system: assures a smooth, quiet and low maintenance performance. No chains means you and the bike stay cleaner, with no oiling.
- Protection: special treatment for corrosion resistance and powder coated for extra protection on every mobile part.
- Micro-adjustable seat: both in vertical and horizontal positions
- Micro-adjustable handlebar: both in vertical and horizontal positions
- **Resistance: Leather friction pad has almost infinite adjustability for fine tuned resistance. This system also acts as an emergency brake.**
- Painting: double layer covering powder painting.
- **Oversized steel frame.**
- Dual SPD-trekking pedals. Feature both standard baskets and cycling shoe clips.
- 4 Adjustable supports at front and rear stabilizers, to guarantee maximum stability.
- Emergency braking system
- Front mounted wheels, which allows easy transportation.
- Rubber tipped feets, for cleaning and vacuuming without scratching the paint.
- Flywheel protecting cover, for protection against sweat and corrosion.
- **Bottle holder, for a constant hydration during the exercise.**
- Designed for optimum exercise biomechanics, to guarantee smooth, natural movements for full muscle concentration
