Important information and warning hints:

Warning! The device is to be used with caution, since it requires great skill, so as to avoid falls or collisions causing injury to the user or third parties. In case of doubt first use the device only with assistance and/or appropriate protective equipment.

When used by children the supervision by an adult is recommended.

Heads up! Collisions with other Skate/Scooter boards or other obstacles must be avoided at all times. Risk of head or finger injuries.

Attention! Riding in a standing position requires special caution and concentration.

Attention! Do not push with your fingers in the area of the rollers - **DANGER OF CRUSHING!**

Warning! The packing is not part of the product and have to be disposed.

Keep plastic bags and films out of the reach of babies and young children – **RISK OF SUFFOCATION!**

After longer or frequent use, check that the screws are tight and retighten if necessary.

Defective and worn parts should be replaced by original replacement parts immediately.

Protect item from damp and wet.

This device is meant for using from persons at the age of 3 up.

Maximum weight capacity: 150 kg

The road surface should be level and smooth.

Holes or edges in the surface as well as obstacles cause damage to the rollers when rolling over.

Regularly check the tire pressure of the air cushion edge. Too little tire pressure leads to damage to the rim during collisions!

In no case use the Running Mouse with airless tires. The valve is located under the plastic cover.

A suitable pump is, for example, the VX Duo Head pump from SKS.

Holes in the tube can be repaired with a bicycle repair kit.

Assembly of towing and holding rope:

The rope is guided through 3 holes on each side as shown, then secured on the underside of the board by a knot.

Attention! The 12 mm holes in the board should always be closed by the rope or plastic caps.

Specification: 75 cm diameter, with air cushion edge for refilling. Incl. towing and holding rope.

With 4 ball-bearing rubber rollers, diameter 7.5 cm.

Due to the large wheels, the Running Mouse 'In/Outdoor' can also roll over small obstacles.
